Clare

Thanks for the info and yes I am planning to being on site during sampling. My tentative travel schedule is:

Tuesday Sep 10 – Fri Sep 13
Mon Sep 16- Thu Sep 19
Mon Sep 23- Wed Sep 25.

Thanks

Brian,

Just to let you know, I am the lead for the NRDA trustees. I received the Field Sampling Plan Addendum today and wanted to update you on the trustees for this case:

Jessica Mauricio JMaurici@tceq.state.tx.us
Andy Tirpak andy.tirpak@tpwd.state.tx.us;
Angela Sunley Angela.sunley@glo.texas.gov

NOAA is no longer participating. Tommy Mobley has moved on and Ron Brinkley is not on this case. I understand that the field sampling is the week of September 9th. Will you be on site at that time?

9597492

Thank you,
Clare Lee

Good afternoon

Based on the currently available funding and the work previously submitted by the PRP for the Phase I RI/FS, EPA is planning to meet with the contractor to discuss how to conduct the sampling for the RI/FS in a phased approach. EPA would like to collect all of the background data, install all of the monitoring wells, and collect all data for offsite AOCs (AOCs 5, 6, and 7). EPA would like to get the sampling started in mid June and expects it be completed within 2 weeks. EPA expects to discuss the data collected with stakeholders and how it can be used to determine the scope and type of sampling to be done at the remaining AOCs. Please note that the installation of monitoring wells will provide additional surface, subsurface and groundwater data for AOCs 1, 2, 3 and 4. I will inform the group when the sampling has been scheduled and I will be any questions you have at this time.

Thanks
